## DETAILED ACTION

1. Applicant's arguments with respect to claims 1-6, 13 and 17-21 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 3-5 and 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Feingold et al. in view of Bryson.

The Applicant is referred to the description of Feingold et al. in the first Office action.

The patent to Bryson discloses a tile or dominoes game, comprising a plurality of tiles or dominoes Figs. 2 – 21. In one embodiment the tiles may have two colored faces wherein the background colors are reversed. For example, a tile having a dark +4 and light –2 represented on its first face would have light +4 and dark –2 represented on its second face, col. 11, line 61 to col. 12, line 6. In view of such teaching, it would have been obvious to incorporate a reverse color scheme to the second face of Feingold's tiles. This modification would have provided Feingold's tiles to be used to form a wider variety of designs having different color schemes, thus making Feingold's tiles more enjoyable to use.

In regard to claims 4, 5, 19 and 20, Feingold discloses that the first color 38a is black, and the second color 38b is white, col. 5, lines 17-24.

4. Claims 2, 6, 17 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Feingold et al. in view of Bryson as applied to claims 1 and 13 above, and further in view of Wakefield.

The patent to Wakefield teaches that it is known in the tile game art to make the tiles 8 from cardboard, col. 4, lines 2-5. Wakefield also clearly discloses that the corners of the tiles 8 are rounded, see Fig. 1. In view of such teaching, it would have been obvious to make Feingold's tiles from cardboard, and to make the corners of Feingold's tiles rounded, in order to make the tiles safe for children.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Hale discloses a doll having two faces Figs. 4A and 4B. The first face has a fist design with a first color scheme. The second face has a second design, that is identical to the first design, but has a color scheme that is reverse of the color scheme on the first face.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

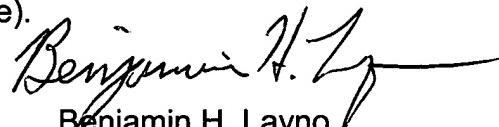

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action:
